DIPLOMATIC SIDE

AGAIN TO FRONT

Sir Edward Grey's Replies to American Notes Are for First Time Made Public

LONDON, March 17.—Sir Edward Grey's replies to the American notes on the use of neutral flags on British merchant vessels and the prohibition imposed upon foodstuffs destined for Germany, in which for the first time Great Britain definitely announces her intention "to establish a blockade," have again brought the diplomatic question to the front.

The replies, which were published here with the American notes, contained no surprises, for beyond the use of the word "blockade," which heretofore has been avoided, their terms have been for the most part known.

The assurance that neutral shipping will be interfered with as little as possible and that neither ships nor cargoes will be confiscated, it is felt here should go a long way toward meeting the American objections. However, another protest is expected.
